

MOHAMAD SAEED AYMAN SAFADI

SOFTWARE ENGINEER

Syria/Damascus | (+963)933596060 / mohamadsaeedsafadi@gmail.com | Date of birthday :1/1/2002

[Portfolio](#)

EDUCATION

Bachelor's Degree in Software Engineering and Information Systems(2026)

Damascus University – Faculty of Informatics Engineering, Damascus, Syria.

IELTS Listening and Speaking(2021)

From university of California, Irvine

[Certificate link.](#)

EXPERIENCE

Volunteer – Junior Chamber

International-Damascus(2025-2026):

-Awarded "Best Member" for June, recognizing outstanding contribution and commitment.

-Provided IT support for events, ensuring smooth technical operations.

-Completed Leader Factory training, enhancing leadership, facilitation, and team management abilities.

-Contributed to content creation for social media platforms, ensuring clear and engaging messaging.

- Translation of the organization's page posts into English

-Earned a Public Speaking Certificate demonstrating effective communication and audience engagement skills.

-Y-10 Certified in mentoring and training adolescents and creating an effective and dialogue-based environment between two generations of young people

- Tiny Roots Certified in training children and managing activities and sessions for them

PROFILE

Software Engineer specializing in backend development, with a strong foundation in software engineering and information systems.

Experienced in developing reliable, scalable, and maintainable backend applications and RESTful APIs using modern software development practices.

Strong problem-solving skills with a focus on writing clean, efficient, and high-quality code. Experienced in collaborating with software development teams, understanding business requirements, and delivering effective technical solutions.

Committed to continuous learning and improvement, with the ability to adapt to changing requirements, work effectively under pressure, and take ownership of tasks throughout the software development lifecycle.

PROJECT

Hands

Nutshell:

An end-to-end service platform connecting clients with professionals, managing requests, real-time negotiation, payments, and ratings.

Source Code: [link](#)

Complaint Management System

Nutshell:A full-stack complaint management system designed for government organizations, consisting of a citizen mobile application and a web-based management dashboard. The system enables citizens to submit and track complaints, attach supporting documents and images, and receive real-time notifications about status updates.

Government employees and administrators can manage complaints, update statuses, add notes, request additional information, manage users and permissions, and generate reports. The system also focuses on security, audit logging, concurrency control, scalability, and a layered architecture.

IT Specialist And ICDL Tester (2024-2026):

Company Name: [Modern Training Center]

Location: [Syria/Damascus/AlSalheia]

-Installed, configured, and maintained hardware, software, and network systems.

-troubleshooting hardware, software, and network issues promptly and effectively.

-Assisted in planning and executing IT projects.

Data entry (2/2021-6/2021):

Company Name : Central Directorate of Statistics

Location: Syria/Damascus/Almazeh
- Four-month work contract and work on the CSPro program.

skills

Engineering Concepts & Methodologies:

- Multithreading & Concurrency
- Asynchronous Programming
- System Scalability
- Distributed Systems
- Load Balancing
- Database Indexing & Sharding
- Domain-Driven Design (DDD)

Advanced Architecture & Software

Engineering Concepts:

- Microservices Architecture
- Clean Architecture
- Design Patterns
- Database Design
- System Analysis & Requirements Engineering
- UML

Core Backend Technologies, Databases &

ORM:

- RESTful APIs / Web Services
- ORM
- MySQL
- Oracle Database

Programming Languages & Frameworks:

- PHP / Laravel
- Java
- C#

Bank System

Nutshell:A scalable banking management platform built with OOP principles and software design patterns to ensure flexibility, security, and high maintainability.

Source Code: [GitHub Repository](#)

Information Retrieval System

Nutshell:A custom search engine designed for high-precision document retrieval, query processing, and relevance ranking.

Source Code: [GitHub Repository](#)

One Hand Application

Nutshell: Online payment through a bank account.

Login as an admin and as a user, in addition to resetting the password.

A complete dashboard for the association's admin to manage it fully.

The possibility of submitting benefit applications that include (the poor-student-supporting small projects-patient-orphan).

Communicate with employees for in-kind donations

Collecting statistics on the number of volunteers and the amount of donations.

Source Code: [GitHub Repository](#)

3D Rocket Launch & Flight Simulator

Nutshell:An interactive 3D space simulation platform with real-time physics-based rocket dynamics and flight control systems.

Source Code: [GitHub Repository](#)

Compiler & Language Parser

Nutshell: A custom compiler engine for domain-specific language parsing, syntax tree generation, and semantic tracking.

Source Code: [View Source Code](#)

Takaful Application

Nutshell:Search for an expert by name and filter experts according to the quality of service they provide

Book an appointment with the expert according to the times he specifies The payment process is done electronically

The possibility of communicating with the expert within the application via messages or voice and video calls.

Source Code: [View Source Code](#)

Medical X-Ray Analysis Desktop App

Nutshell:A C# desktop application for medical image processing, feature extraction, and automated diagnostic reporting.

Source Code: [View Source Code](#)

- Python
- C++
- JavaScript / Three.js

Testing, Tools & Enterprise Systems:

- Git
- Unit Testing
- Odoo ERP

Soft Skills & Additional Skills:

- Problem Solving
- Teamwork
- Communication
- Attention to Detail
- Adaptability
- Time Management
- Continuous Learning
- English
- Content Writing
